BUILDING SOLUTIONS

Yes We Can!

Fabric & Modular Structures

Who is Vertical?

We are one of Canada's most respected providers of pre-engineered fabric and remote structures.

Why Vertical?

At Vertical we believe our customers come first. Our vision is to build the most innovative fabric structures and steel modular buildings in all of Western Canada. At Vertical our brand promise is simple — **Yes We Can!**

FABRIC STRUCTURES

MODULAR STRUCTURES

Get The Vertical Advantage

- > A company with honesty and integrity.
- > Exceptional customer service.
- > On time delivery.
- > Proven safety record.
- > Certified installers.
- > Quick installation.
- > Highest quality building materials.
- > Adhere to all building codes & requirements.
- > Over 40 years combined experience.
- > Selection of colours and sizes.
- > Safety and reliability.

**GEOGRAPHICAL
AREAS WE
SERVE**

Fabric Structures

Our custom fabric structures are stable and secure, designed for mobility, and able to withstand the harshest of climates with little long-term maintenance required.

Our simplistic design and straightforward set up allows for quick and easy assembly with minimal downtime and no construction delays or problems.

Why Fabric Structures?

- > Cost effective.
- > Versatile in all weather conditions.
- > Easy to Relocate.
- > Customized designs.
- > Mobile for multiple uses and locations.

Fabric vs. Other Traditional Materials

- > Lighter than other forms of construction.
- > Natural illumination (lower power costs).
- > Faster repair.
- > Overhead space - Allows increase air movement.
- > Easy to clean from dirt and debris.

Building Solutions For All Industries

INDUSTRIAL

Oil and gas.
Mining.
Bulk material storage.

AGRICULTURAL

Riding arenas.
Hay shelters.
Barns.

MUNICIPAL & COMMERCIAL

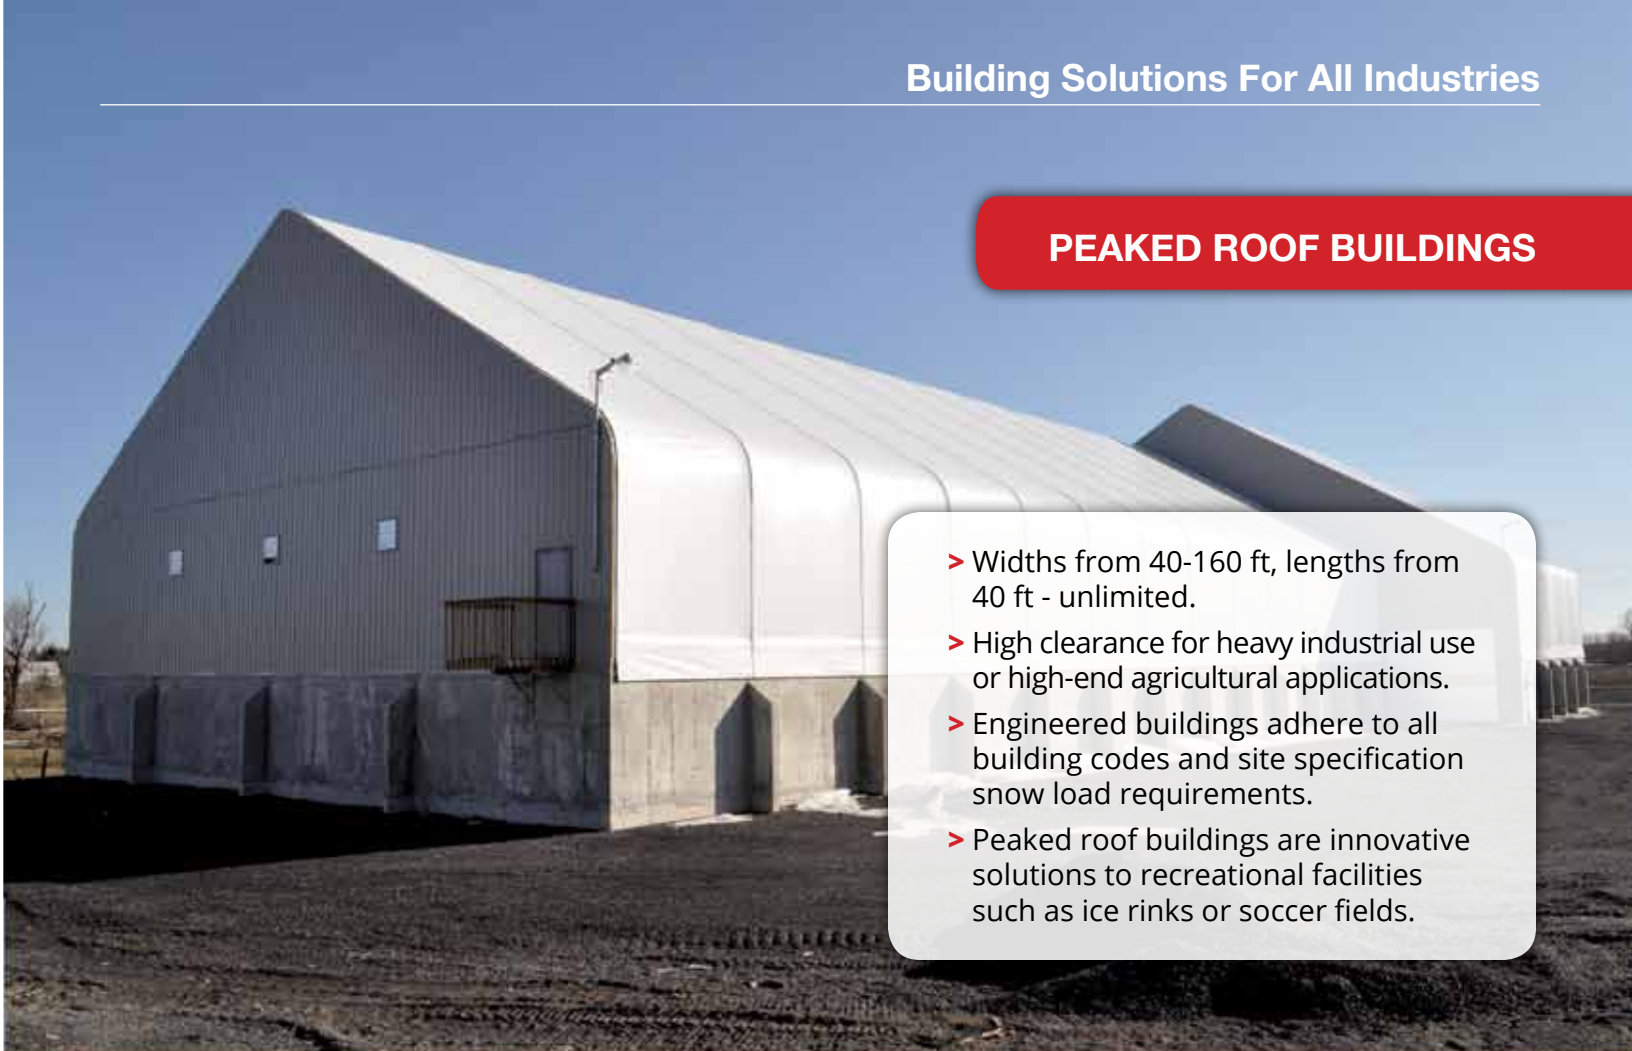

Warehousing.
Equipment.
Service and maintenance facilities.

ARCH TRUSS BUILDINGS

- > Widths of 28-72 ft, lengths from 30 ft - unlimited.
- > Professional installation provided.
- > Choice of colours.
- > Custom finishing options.
- > Engineered structures with guaranteed site specific snow loads.
- > Offer several foundation options to suit each install.

AIR STRUCTURES

- > Blast resistant shelters at dangerous work sites.
- > Instant storage facilities for materials, tools, and equipment.
- > Offer weather protection for workers in extreme heat or cold and in rain or snow.
- > Vertical Buildings supplies Air Shelters for rent or purchase.

PEAKED ROOF BUILDINGS

- > Widths from 40-160 ft, lengths from 40 ft - unlimited.
- > High clearance for heavy industrial use or high-end agricultural applications.
- > Engineered buildings adhere to all building codes and site specification snow load requirements.
- > Peaked roof buildings are innovative solutions to recreational facilities such as ice rinks or soccer fields.

SINGLE ARCH BUILDINGS

- > Entry level, light duty buildings available in widths from 12-26 ft, lengths from 30-60 ft.
- > Price advantage.
- > Ideal for home and yard, light duty commercial, and dry storage.
- > Quick delivery and installation.
- > Non-engineered buildings.
- > Carry no guaranteed snow load.

Steel Modular Structures

We are proud to be leading the way in Western Canada by offering steel modular building units that provide all the comforts of home while working on site.

Our Cor-Ten Steel Modulares are constructed under factory conditions and are built to last over 100 years. Compared to traditional construction, no other method can match modular buildings for speed of delivery, reduction of wasted materials, and flexibility to relocate. Our modulares come complete with plumbing, heating and electrical connections. Our manufacturing process is 50% faster than traditional site bases construction systems.

WORKFORCE HOUSING

- > Workforce camps
- > Well site accommodations
- > Jack and Jill units

MULTI UNIT

- > Hotels
- > Apartments
- > Student Dorms.

SHARED FACILITY

- > Individual self contained with washrooms.
- > Other shared applications

Benefits Of Steel Modulares

- > 95% completed in controlled factory.
- > Flexibility - easily expanded, reduced or re-configured.
- > Easy to relocate from one job site to the next.
- > Fast and easy installation (even in winter).
- > Environmental friendly materials: bamboo, rockwool, steel.
- > Mold resistant.

Size Options Available

1 person module

2 person module

4 person module

8 person module

Modular Building Process

Available in 8' to 12' widths to accommodate any application.

Specifications & Features

8', 10', or 12' wide x 40' or 60' long x 10' high Cor-Ten Steel.

External: 40' x 8' x 9' - 6".

Interior Wall Ceiling: Drywall, or painted metal panels.

External Door: Fire-resistant insulated metal door.

Interior Door: Sliding metal doors and regular metal/wood doors.

Window: Double-glazed windows with thermal breaks.

Heating & AC: CAS standard heater and or / CSA standard AC Unit. Customized to suit local requirements.

Electrical System: CSA standard light fixtures.
